

Data Analysis by categorical and by provinces

These data contain all the datasets that are divided by all provinces by

- Above year of 2016
- 2016-2017
- 2018-2019
- 2020-2021.

However, these are only categorical with **Average annual hours worked**.

Based on the research that I did, almost each datasets contains at least 30 observations and each divided into 10 observations per each year.

Python code how I generated these:

```
ProCode = 0

for ProCode in range(13):
    df_AvgAnnHrsWrk_above_2016_ByAge_Provinces.outputProvince(ProCode)
    print("\n2016 - Overall By Age group")
    df_AvgAnnHrsWrk_above_2016_ByAge_Provinces.outputAnalysis(ProCode)
    print("\n2016")
    df_AvgAnnHrsWrk_2016_ByAge_Provinces.outputAnalysis(ProCode)
    print("\n2018")
    df_AvgAnnHrsWrk_2018_ByAge_Provinces.outputAnalysis(ProCode)
    print("\n2020")
    df_AvgAnnHrsWrk_2020_ByAge_Provinces.outputAnalysis(ProCode)

    print("\n\n2016 - Overall By Gender Group")
    df_AvgAnnHrsWrk_above_2016_ByGender_Provinces.outputAnalysis(ProCode)
    print("\n2016")
    df_AvgAnnHrsWrk_2016_ByGender_Provinces.outputAnalysis(ProCode)
